

35/3, 2 July 57: Von Cube was a prisoner of war of the Americans and was treated extremely well, particularly in the hospital when he was treated for the leg he lost. He is extremely interested in the United States, and we spent a considerable amount of time discussing the life and political thinking of the United States as compared with that of Germany. He was born in Siberia and feels that he knows the Russians rather well. He has a very great distrust for them and is very sceptical about any disarmament/we might come to with them. He believes Western agreement troops should stay in Germany for the next 25 ~~yr~~ or 50 years.

# NAZI WAR CRIMES DISCLOSURE ACT
